EDUCATION

Rensselaer Polytechnic Institute (RPI), Troy, NY

Expected May 2017

Bachelor of Science in Computer Science

GPA: 3.73/4.0

- Relevant Coursework: Data Structures, Introduction to Algorithms, Operating Systems, Programming Languages, Database Systems, Network Programming, and Software Documentation and Design; currently taking: Distributed Systems and Algorithms and Cryptography and Network Security I
- Honors: The Rensselaer Medal; Dean's List

SKILLS

Programming Languages: Python, C++, Swift, C, Java, NodeJS

Operating Systems/Platforms: macOS, iOS Development, Android Development, Linux, Windows

Language: Native English speaker and working knowledge of Spanish

EXPERIENCE

IBM, Innovation Platforms

June-August 2016

Software Developer Intern

- Created a RESTful API backend in NodeJS/Express for an email digest service and integrated it into an existing front-end
- Created a tvOS application and a RESTful API backend in Kitura for an IBM product
- Worked in an Agile team based environment using tools such as Github, Slack, Mural

Code U Mentorship Program

March-August 2015

Participant

- Worked under the guidance of a Google engineering mentor on a series of technical exercises focusing on data structures and algorithms
- Completed Udacity's Developing Android Apps course, worked with two other participants to create a crowd sourced tutor finder called "StuddyBuddy" in two weeks

Rensselaer Polytechnic Institute, Office of Residence Life

Fall 2015-Current

Resident Director

- Oversee a First Year Residence Hall on Campus of 150 residents and 4 student staff
- Ensure that the residence hall remains a safe environment for students
- Complete room checks, incident reports, fire safety checks ,and evaluations

PROJECTS

RPI Tours

- Lead iOS developer on an open-source iOS application in Swift designed to allow prospective students, returning alumni, or anyone interested about RPI to go on self-guided tours of RPI's campus. Currently in active development

RRS Payload

- Co-Developer of an open-source, Arduino based, payload for a competition rocket for the Rensselaer Rocket Society (RRS). The payload gathers pressure, humidity, temperature, gyroscopic, acceleration, GPS, and altitude data in real time and relays it back to a ground station.

ACTIVITIES/LEADERSHIP

Rensselaer Rocket Society (RRS)

Fall 2013-Current

- Vice President (Spring 2014)
- President (Fall 2014 - Spring 2015)
- Active member in the construction of a competition level rocket. Participate in community outreach programs with a local Girl Scout troop.

Rensselaer Center for Open Source (RCOS)

Fall 2014-Current

- Active member in community for developing open-source applications/tools that can solve societal problems.
- Current project mentor on three different projects
